**Our lighting solutions for rooms with an emotional touch.** We are an Austrian supplier of lighting solutions that we create at our development and production site in Weißkirchen/Wels. High-quality functional lighting that brings together outstanding technology and state-of-the-art design and which we can effectively combined in customised lighting concepts.. We create a positive atmosphere in the room and make lighting an enjoyable experience.

**Not all solutions are equal.** We know that for a fact because Molto Luce has been gathering extensive know-how for more than 40 years, which is put specifically to use in every individual lighting project. We delight in the wealth of opportunities that professional lighting brings, no matter the area of application:

- Shop and Retail
- Office and Corporate Architecture
- Industry and Trade
- Public Buildings
- Private Living and Hospitality
- Health and Care

# GOOD EMOTIONS

A number of aspects therefore take centre stage in our development processes. Smart design meets functionality and efficiency in the finished product. Add in the key aspect of sustainability and an emotional impact tailored to human needs and light does so much more than fulfil a function. **The end result is rooms with real, perceptible added value.**

# GOOD LIGHT STORIES

**We understand light and consider people and the environment.** As a manufacturer and experienced project partner in the field of high-quality lighting solutions, we are 100% involved in creating good light throughout the entire service process.

Our input into a harmonious lighting atmosphere covers multiple touch points: beginning with the design process for the lighting fixtures, right through to the after-sales phase, for example professional arrangement of the lights in the project on site.

This results in a multitude of benefits for our partners, because we understand the technology as well as planning or installation. We are a reliable supplier with integrity, including for international projects.

**Did you know...**

...around 96% of the CO2 emissions from a light are produced during its service life? We therefore see it as our mission to develop extremely efficient and sustainable lighting solutions. And there's more: as a company, we take responsibility for more than just our products and lighting projects. We are also committed to a spirit of fairness in every phase of our processes and keep the responsible handling of our world's resources in mind.

In the **People. Power. Planet.** programme from Molto Luce, all of the aspects come together in a transparent image. Each of the three pillars has clearly defined goals that we have developed specific measures to achieve. We are constantly delighted to achieve the milestones we have set, but at the same time are faced with new challenges and opportunities which we look at candidly!

**You can rely on Molto Luce – we care.**

We rely on solution-oriented action and development of innovative products, while we take care of the well-being of people and conservation of our environment.

DEVELOPMENT AND PRODUCTION IN AUSTRIA

# OFFICE

Nowadays, modern businesses increasingly place value on attractive design for their company buildings and office spaces. Architecture and light are inextricably linked here. The lighting plays a key role, influencing the atmosphere and perception of the company building not just through function, but also through design. Office lighting is becoming increasingly important in this context, because high-quality lighting not only promotes employee well-being and productivity, it also makes a subtle contribution to the overall impact of the company.

# OFFICE

## LENS 2

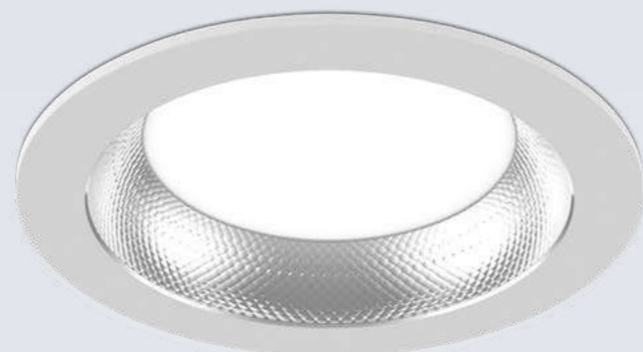

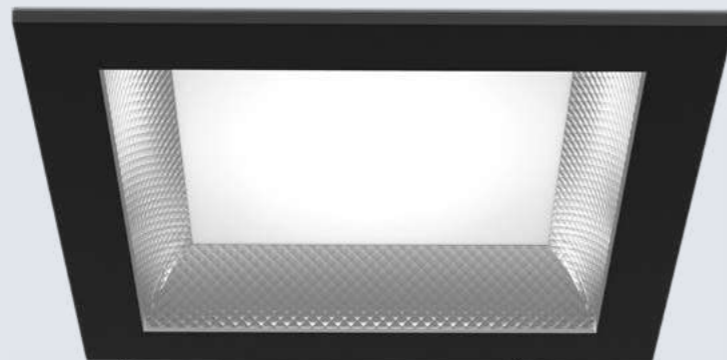

Lighting series for single, double, triple and quadruple workstations, single-point control for daylight and motion detection optimises energy consumption, perfect glare control of UGR < 16, 500 lx - 750 lx - 1,000 lx - 1,500 lx, faceted high-gloss louvre in black or silver, specially developed optics, full-surface sensor matrix for optimal energy efficiency available.

## OTIN

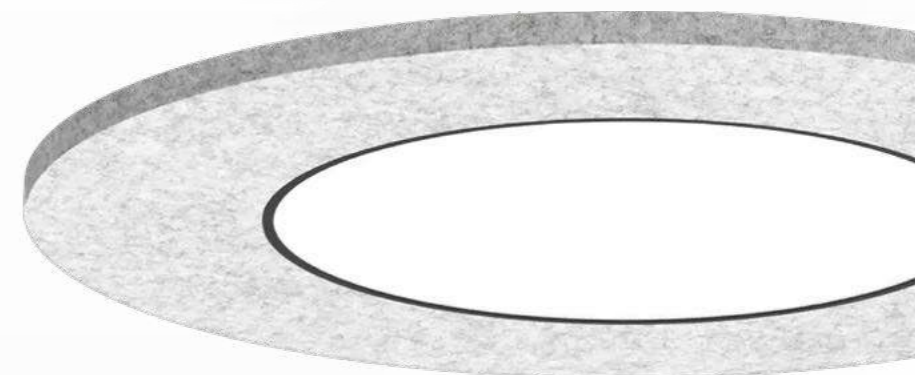

Downlight series with extremely high efficiency (> 170 lm/W), modular design in a variety of diameters, round or square, specialised for installation in a wide range of ceiling sections, tool-free replacement of LED circuit board and converter, shiny or white matt faceted reflector, black or white matt cover ring, design with integrated motion sensor, with specially developed high efficiency switchable converter.

## ACOUSTICS

Acoustic lighting series made from recycled, thermally bonded non-woven fabric, combination of room acoustics and a pleasant lighting mood, available in white mottled, grey mottled and anthracite mottled in BOARD or BAFFLE versions.

## LOG 50

Profile lighting series made of aluminium, surface white, black, grey or powder-coated in Creative Colours, available as a surface-mounted, recessed or pendant variant, linear or round designs, single lights or system variants available.

## INTERO

Energy-efficient office lighting with replaceable LED light source and steel sheet converter, rectangular or square, perfect for ceiling grids, available in Creative Colours.

High-quality glass touch display, direct/indirect ratios and brightness stepless adjustable.

Perfect product display requires a reliable partner as well as the selection of precisely coordinated lights and innovative technologies. Modern lighting solutions provide a crucial advantage when presenting goods and therefore have a direct link to economic success. A perfect demonstration therefore not only helps to impress customers, it also improves the outcome in the long term.

## ROGGA

Elegant spotlight series with tool-free replacement of the LED, optic and 3-phase track adapter, large range of lights with the same form factor (3-phase, 2-phase and 24 V track, recessed, surface-mounted, pendant), recessed versions with easy-to-install click system, various tube lengths, in black, white, grey and powder-coated Creative Colours, AC and DC designs possible.

## TARIO

Corridor spotlights with tool-free replaceable light inserts with a microfaceted grid look, linear design for discreet but highly efficient shop lighting (> 135 lm/W), designs 1 or 2 lights with different light lengths for 3-phase track, tool-free adjustment of the tilting light inserts using a latch mechanism, wide variety of options for light beams (wallwasher, wide beam, narrow beam, oval), luminous flux can be adjusted on the lights and tool-free replacement of the converter, black, white and grey powder-coated.

# INDUSTRY

Modern lighting systems are proven to improve efficiency, particularly in large production and logistics halls, resulting in noticeable cost savings. Optimisation of the lighting situation also creates a pleasant working atmosphere.

The efficiency potential can be further increased through the use of energy-efficient and long-lasting LED lights, combined with innovative control and sensor technology (light 4.0) which divides the lighting into zones and controls it. Innovative solutions not only ensure an adequate amount and quality of light in halls, they also take advantage of all the possibilities to make this happen as energy and cost-efficiently as possible.

## LIGHT 4.0

Our modern lighting systems with direct communication between sensors and DALI-2 lights offer flexible planning options. Our **trunking system, high bay or damp-proof luminaires** allow energy and CO<sub>2</sub> savings of up to 91% thanks to intelligent controls.

### The benefits at a glance:

- High potential for cost and CO<sub>2</sub> savings
- Independent zone-based concept
- Integrated daylight and motion sensors with an installation height of up to 14 m
- Dimming of the entire system according to daylight or utilisation
- Collection of analysis data

### Additional benefits of our stand-alone Bluetooth mesh solutions:

- No central controls or DALI wiring required
- Low acquisition costs and low effort for commissioning
- Delay times and light levels can be freely defined
- Very easy to control using a free SILVAIR APP

Our partners for Light 4.0:

# INDUSTRY

## TRAIL

### Backbone for different applications

- One-for-all-solution for projects from IP20 till IP66
- Significantly reduced assembly time

### Flexibility

- Easy adaptation to individual needs and changing conditions

### Light inserts and optics

- High quality of light and ideal visual conditions for every kind of activity

### Future and operational safety

- Guaranteed by durable quality components
- Service life up to 100,000 hours L90

### Light 4.0

- Simple sensor integration for various control options options - input device (IPD) for centralised control or application controller (APC) for stand-alone.

## TUNE

### Perfect light level for professional applications

- Excellent glare protection and visual comfort – even for the most demanding applications in industry

### Future and operational safety

- Robust construction according to thermal requirements
- High chemical resistance
- Interchangeability of components

### Customizable

- Many different lumen outputs for an uncompromising application

### Light 4.0

- High-quality DALI-2 DATA D4i ballasts enable simple Bluetooth Mesh integration and communication between luminaire and user

Creative and modern lighting concepts create moments of well-being. They make room for pleasure, relaxation and comfort. Whether within your own four walls or in the hotel and restaurant sector – light is a key factor in creating harmonious experiences, establishes emotional staging and thus caters to a wide range of needs. A custom lighting concept is able to capture every mood and create a space that radiates a feeling of well-being.

## LON

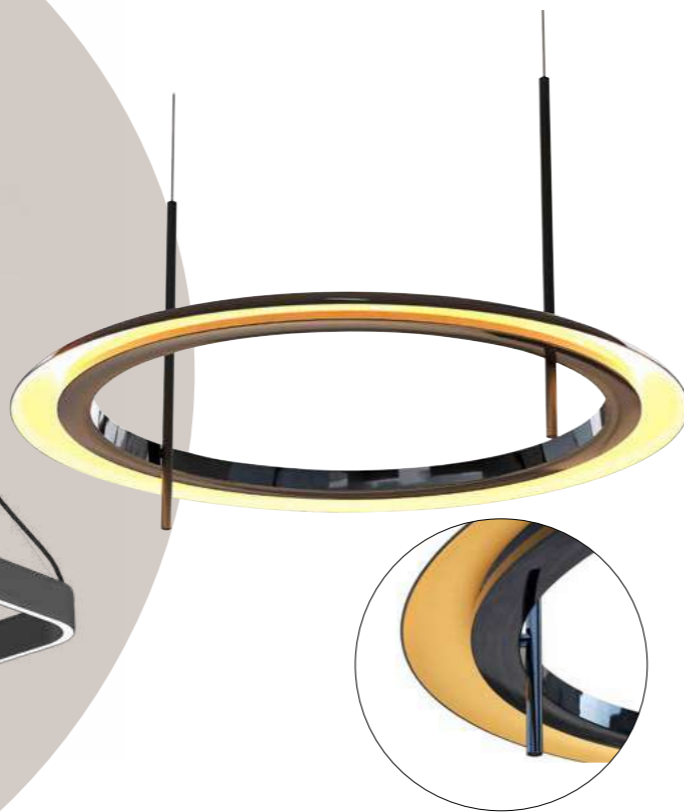

Ceiling or pendant luminaire series, Ring or Hexagon, made of aluminium in black, white, grey or Creative Colours, switchable, with flexible opal diffuser, 2700K, 3000K or 4000K, DALI or casambi dimmable.

## VUTO

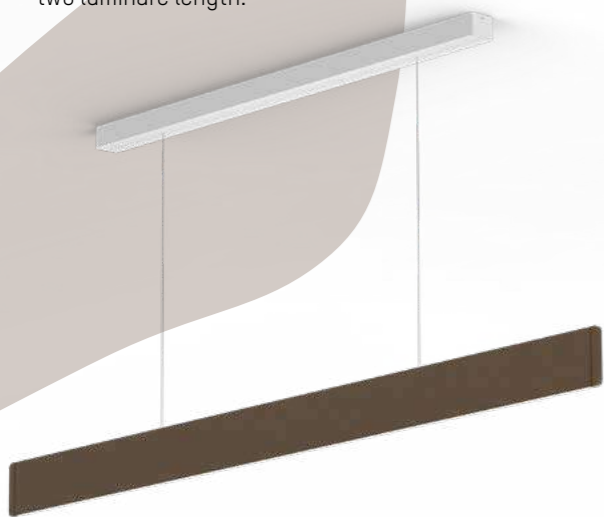

Ring light with intricate suspension, prismatic look, almost glare-free lighting effect, DALI dimmable, 2700 K, elegant look for atmospheric moments.

## AFTER 8

Ultra-slim pendant luminaire with 6 mm light width, made from brushed aluminium and with an anodised finish in black, slate and champagne, unobtrusive power supply using steel cables, direct/indirect beam, two luminare length.

## MELLI

Lighting series made from black aluminium, light colour 2700 or 3000 K can be selected, optionally indirect or direct/indirect beam, available as a wall/ceiling light or floor lamp.

## WALL 68

Recessed wall light made from white or black aluminium, light colour of 2700, 3000 and 4000 K and brightness of 30, 60 or 100% can be individually selected, round or square design available.

## MAG

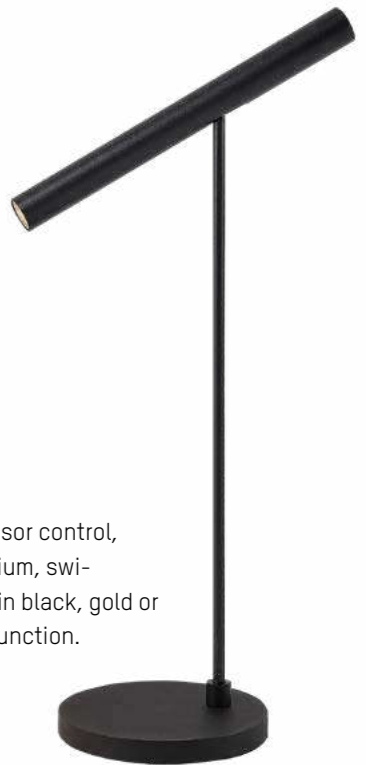

Surface-mounted light made from white or black powder-coated die-cast aluminium. Available as a fixed ceiling light and as a pivoting and swivel-mounted wall or ceiling light.

## MEYJO

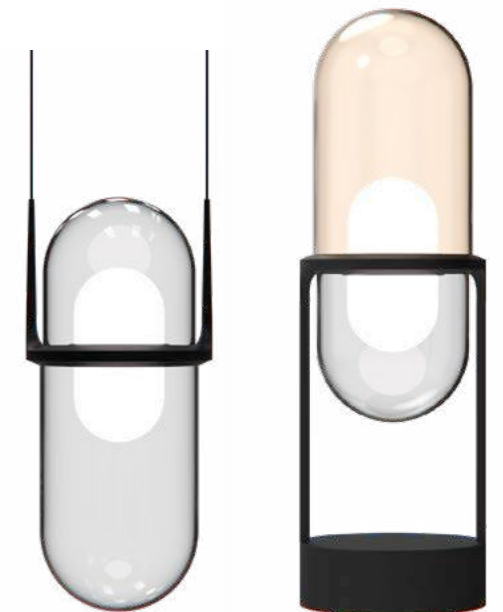

Table and floor lamp with sensor control, black powder-coated aluminium, swivel-mounted luminaire head in black, gold or bronze, continuous dimmer function.

## PILLE

Lighting series made from hand blown crystal, various colour combinations available, available as a pendant, wall/ceiling, table or floor lamp, DALI dimmable.

## MAGNETICS

Black profile system, can be equipped with a wide range of light inserts, profile for recessed, surface-mounted, floor and pendant luminaires available, magnetic light inserts.

# LIGHTING REFURBISHMENT

Since the ban on fluorescent lighting which entered into force across the EU on 25/08/2023 and the end of halogen lamps on 01/09/2023 at the latest, it is high time to think about the various options and potential savings. In addition, the trends in energy prices in recent years have shown how quickly costs can go through the roof. That's why you should act now and not delay. By taking advantage of attractive subsidies for efficient lights, it is easy to save cash as well as energy. **Energy, cost and CO<sub>2</sub> savings of up to 91%** are possible thanks to state-of-the-art technology.

## Warehouse

	before light refurbishment	after light refurbishment	
<b>Operation data</b>			
Lighting system	T5 lamp	TRAIL trunking system	
Overall performance	8.268W	2.160W	-74%
CO <sub>2</sub> Emissions (annual)	5,5t	0,5t	-91%

<b>Operation costs / year</b>			
Energy costs *	12.402 €	1.166,5 €	-91%

\*Assuming an average electricity price of 0.5 euros per kWh

**Amortization**  
Saving on energy costs/year **11.235,5 €**

## X-CHANGE

### REPLACEABLE MODULES

The Molto Luce X-Change technology, which allows for easy and tool-free replacement of an LED on a COB basis, was first used as a mass-produced product in the MOVA LED track spotlight and is now part and parcel of some of our products. RO6GA now goes one step further and also allows the converter to be replaced. This sets the next key milestone for maximising the longevity of luminaires.

Learn more

## BENEFITS

- Cost efficiency thanks to inexpensive replacement of the luminaire components
- Easy handling thanks to tool-free replacement
- Sustainable and resource-saving
- Decorative luminaires become a long-lasting design object

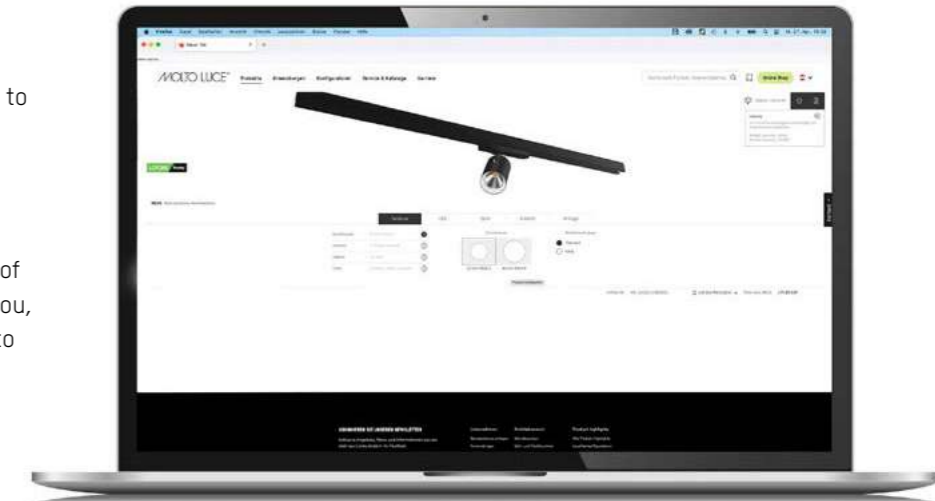

# LIGHT THAT'S AS INDIVIDUAL AS YOU ARE

### Boundless variance

We offer unbeatable variety with our innovative lighting systems. From elegant designs through to state-of-the-art technology.

### Experts in individual solutions

In addition to our comprehensive range, our experienced lighting experts offer a wide range of other planning options. Working together with you, bespoke individual solutions precisely tailored to the actual requirements can be developed.

Millions of options in real time and with exceptional attention to detail

Try configurators

## MOVA

Ten million possibilities, state-of-the-art technology & clear design. MOVA can thus be perfectly tailored to a wide range of requirements without changing the look of the particular lighting architecture.

## COLOURFUL LIGHT. COLOURFUL LIFE.

Molto Luce responds to the trend of colourful accents in architecture and offers the options of making statements with its charming Creative Colours.
